This fan-fiction article, **Earkorlidipar**, was written by Adalwulf of Aedirn. Please do not edit this fiction without the writer's permission.

This article, **Earkorlidipar**, is part of the Extended Ancient Pantheon Expanded Universe. It may not be consistent with other timelines.

Originally a Wolf Beastial (Wolf Therianthrope) created by the Protas known as Wijun, the God of Beasts. **Earkorlidipar** was kidnapped by Stalnitherath, The Pestilent Discord and hybridized to become a Great Old One. He commanded an army of infectious lycanthropes and was the creator of the curse version of Lycanthropy. He would also bite other Beastials resulting in new strains of the Therianthropic curse.

Earkorlidipar	
Physical Description	
Race	• Therianthrope • Werewolf (Originally) • Cosmic Horror Hybrid • Great Old One • Prime Cursed Therianthrope
Gender	Male
Eyes	• Blue (Originally) • Red (Currently)
Skin	• Brown (Originally) • White (Currently)
Political Information	
Rank	Great Old One
Titles	• The Man-Eater

Biography

The Battle of The Man-Eater (941,079,574 BR)

On the planet Baiphus, the **Protas** Queen **Asherah** finds and battle the Great Old One and foster child of Stalnitherath known as **Earkorlidipar, The Man-Eater** and his army of lycanthropes, she slays the army and banishes **Earkorlidipar** to The Desolate Dimension.

Physiology

Ancient Times	
	Wolf Beastial (Pre-Transformation into a Cosmic Horror) As a Wolf Beastial before the time of humans, **Earkorlidipar's** favored form was his Near-Man Form which resembled a bipedal wolf about 1.5 times the size of a regular human. He could turn into four of the five later forms but didn't learn to turn into a Man Form until much later. His Wolf Guardian Form was almost double his **Near-Man Form's** size making him the largest of his siblings and comrades a distinction that unfortunately got him noticed by Stalnitherath.

Modern Times	
	### Cosmic Horror Man Form Even though **Earkolidipar** lost most of his reasoning and restraint, he was able to gain a Man Form later as part of his expanded power set. Since this form is smaller and easier to maneuver through smaller spaces such as buildings, he sometimes would assume this form, especially in pursuit of prey or a prospective turnee.
	### Cosmic Horror Near-Man Form
	### Cosmic Horror Wolf Tyrant Form Once **Earkolidipar** became a Great Old One, he would increase in size even further by a further 2.5 times, his brown coat taking on a white sheen that contrasted with the blood on his jaws and claws. His blue eyes once held such intelligence turned red with hunger and fury.
	### Cosmic Horror Dire Wolf Form
	### Cosmi c Horror Wolf Form

Abilities

- **Cosmic Horror Physiology**:
  - **Alien Mind**: The inner workings of an **Old One's** mind differ greatly from what could be considered "normal" or "sane" by the standards of most living things.
  - **Contagious Influence**: An **Old One** can taint those around them with a physio-psychoactive influence that can twist and warp their very appearance and mindset to whatever the individual desires.

- **Fanaticism Inducement**: **An Old One** can induce fanaticism, the belief in something with uncritical zeal or obsessive enthusiasm.

- **Werewolf Physiology**:
  - **Authority (over turned werewolves and those affected by the curse)**:
  - **Berserker**:
    - **Berserker Form**:
    - **Feral Mind**:
  - **Bodily Aspect Enhancement**:
    - **Muscle Mass Enhancement**:
    - **Partial Transformation**:
    - **Size Manipulation**:
  - **Dark Arts**: Originally on the side of the Protas, specifically amongst the ranks of Wijun's therianthrope army, the being that would come to be known as **Earkolidipar** learned Beast Magic which was corrupted when he was changed by **Stlanitherath's** corrupting disease magic.
    - **Corrupted Wolf Magic**: **Earkolidipar** using a corrupted form of his original Beast Gift from **Wijun** can use magic to control wolves, transform himself or others into wolves, mimic wolf traits and summon/create wolf spirits and/or wolves. He can communicate with ordinary wolves, borrow their senses, possess them and otherwise use wolves as extensions of themselves.
  - **Natural Weaponry**:
    - **Claw Retraction**:
      - **Infectious Claws**: **Earkolidipar** possesses claws that are coated with or secrete infectious agents, which can extend to the victim when they are cut by the claws.
        - **Lycanthropic Infection**:
      - **Wallcrawling (via claws)**:
    - **Fang Retraction**:
      - **Infectious Bite**: **Earkolididar's** fangs and/or saliva contain different substances that they can spread to others through their bite.
        - See Lycanthropic infection: **Conversion**: **Earkolidipar** can cause others to change from one form to another and transforming other beings into other kinds of entities, namely inflicting the Lycanthropy virus and later using his Wolf Magic, a Lycanthropy curse.
  - **Regenerative Healing Factor**:
    - **Supernatural Regeneration**:
  - **Reproduction via Conversion** (Ancient Cursed Lycanthropes): **The ACL** were able

to essentially reproduce via transmission of the **Lycanthropy virus** which transformed a person or a creature into an **ACL**.

    - **Sire Bond**: **The ACL** formed powerful bonds with those they sired such as their progenies via the conversion process, making the sire able to sense their progeny's presence and compel them to follow orders (This could be overridden by the next oldest if the former leader was kept alive but in a weakened state). This particular ability linked all the way back to **Earkolidipar** who had complete control over his children and could summon them from any distance. 'Children' could feel the status of their 'parent' and vice-versa, the death of directly related **ACL** would cause the other pain.

- **Therianthropic Infection**: **Earkolididar** can turn others into werebeasts. If one is not a Beastial, then they would usually become an **ACL** but in the case of him biting a Beastial, it would create a new therianthrope species based on the type of Beastial that was bitten.
- **Vertical Pupils**:

Weaknesses

Lowered Intelligence

Due to the high heat level, the virus puts his body through Earkolidipar's brain, which is overheated and constantly dulling the level of intelligence he once had access to.

Silver

This metal has a debilitating effect on him hampering his regeneration ability and causing pain.

Behaviors

Need for family

Earkolidipar desires to be a part of a family or pack, as such he will seek out strong individuals to change, or if he is alone will change whoever he can. These affected would become **Ancient Cursed Lycanthropes** which are very different than modern day Werewolves and Lycanthropes. **ACL** were larger, more muscular, and highly virulent with a single bite even from his progeny being enough to infect an individual, this tainted blood could be detected by other **ACL**s who would not attack a victim that had contracted the virus.

Prime Cursed Therianthrope

Earkolidipar due to the viral nature of his being created new types of Cursed Therianthropes when he ended up biting and changing other Beastials during the War. These tainted acts would result in various curses that would continue to exist into the modern day infecting mostly humans.

Stuck in a fever dream

Earkolidipar has all of his previous connections and memories they are just hampered by instinct and delirium brought on by the virus he hosts.

Relationships

Original Creator

- Wijun, the Protasic Embodiment of the Hunt and Faunal Life

Foster Father

- Stalnitherath, The Pestilent Discord

Foster Brother

- Gna-Limer, The Dull Bloodsucker

Lycanthropy Virus

The Lycanthropy Virus of **Earkolidipar**, is unique compared to the modern-day curse variant as it is virulent in nature, and is able to be passed through a bite.

Symptoms

Following the bite, all wounds and imperfections would be healed while the victim who would almost always pass out would sleep, when they wake the process would have restored lost limbs, organs and have cured any other diseases they might have had. Next, the eyes of the subject would turn golden followed by a general shift in personality to be more aggressive and dominant before finally, the subject would forcefully transform into an **ACL**.

Cure

Strangely enough, though the curse is viral, transformation into an **ACL** could be negated if someone higher in the bloodline order was killed freeing all those changed by them and their progeny.

Notes

- **The ACL**s are based on the werewolves from the video game 'The Quarry' by Supermassive Games. All original credit for these creatures goes to them, I'm just giving them a Witcher twist to add them to the lore of the Multiverse.
- **The ACL**s and the Lycanthropy virus that creates them were completely removed from the mortal verses during the Protas-Cosmic Horror War though the disease's original contractor **Earkorlidipar, The Man-Eater** was also spared and banished to the Desolate Dimension so there is a chance of it being able to return.
- My articles are to cultivate storytelling and inclusion, should you want to include Earkorlidipar or his **ACL**s in your stories despite their missing status, its easily doable with space-time portals.
- The werewolf disease that would come to be known as **The Lycanthropy Virus** are a

purely fanon creation as such there is no official proof of its existence in the Witcher works outside the fanon community.
